

Ice Cubers Cleaning

dissolves water scale, calcium & rust deposits safely, quickly and effectively!

York & Carrier Ice Cubers

1. Close water supply valve **(WS)**.
2. Isolate refrigeration cycle.
3. Add 12 ounces of **Eco Descale** to the approximate two (2) gallons of water in the reservoir.
4. Start circulation cycle and circulate until all scale has been removed from the chutes. This requires about 10 minutes.
5. Drain the reservoir.
6. Open water supply valve **(WS)** and fill reservoir.
7. Flush pump, nozzles, chutes and reservoir for 5 minutes with clear water.
8. Once again, drain the reservoir.
9. Open water supply valve **(WS)**, cut in all cycles and run 3 batches of cubes.
DISCARD THESE CUBES.
10. Machine is now ready for production.

Eco Descale is free rinsing with NO DANGER of copper chloride, copper sulfate or soluble copper reaction.

Eco Descale is certified for use in potable water systems. **Eco Descale** is non-injurious to your hands and safe to use.
